NOTES:
 - The margin between on site measurements and plans can be up to 10 cm.
 - The solution proposed can be altered on-site, if a better solution presents itself, or if there are hidden elements that we were not aware of before.
 - Before ordering any materials, builders must check the measurements on-site.
 - Underground services have not been located.

An elevation is the height of the structure from ground level to the height of the roof.

An elevation is the height of the structure from ground level to the height of the roof.
