Purpose

This document has been designed to clearly set out your options when selecting and customising your design and choosing your internal and external inclusions.

Inclusions by Design

Please note that the inclusions and features which are listed in this document are for our 50+ designs; please refer to the floor plan of your preferred design to determine which inclusions apply (for example, whether there is a kitchen etc).

Appliance Codes

Where various appliances are listed, we have provided, not only a brand name, but also a model number to allow you to search for the product, so you know exactly what you're getting.

Allowances

An allowance is a set value provided to our customers enabling them to allocate these funds towards a specific item or feature. For example, you will see an allowance for tiling of \$50 per sqm for tiles.

In practice, this means you would visit a showroom or store to select the tile of your choice up to the value of \$50 sqm – if the total cost is above this allowance, we will adjust your end budget. Similarly, if the total cost is less than \$50 sqm, we will adjust the total end budget. All allowances and prices include GST.

Measurements

sqm = square metre
mm = millimetre

SYMBOLS

We believe our customers should have control over the styles and inclusions to be incorporated in their design, where it's possible. We have used three symbols to help you identify what choices you have in selecting specific items.

TICK

When you see the tick symbol, it means the item listed is automatically included in your design. If there is more than one tick per category, you may choose between the inclusions which are listed at no additional price to the budget for the specified design.

PLUS

To give you further options, when you see the plus symbol, it means you can choose to upgrade to the premium item listed, at an additional price.

SEARCH

When you see the search symbol, it means you have the option to search for an alternative item yourself. We will do our best to incorporate your alternative item in your design, however, not all items can be incorporated because they may not suit the floorplan of your chosen design and/or comply with applicable Australian standards.

KITCHEN - KITCHENETTE

BENCHTOPS	 Laminate standard colour range	 Stone benchtops	 Timber benchtops	
OVEN	 Franke FCE60M5B--A Black Glass Electric 600mm wide	 Westinghouse WVE615SCA Stainless Steel 600mm wide	 Bosch HBA534ES0A Stainless Steel Electric 600mm wide

MBA certificate

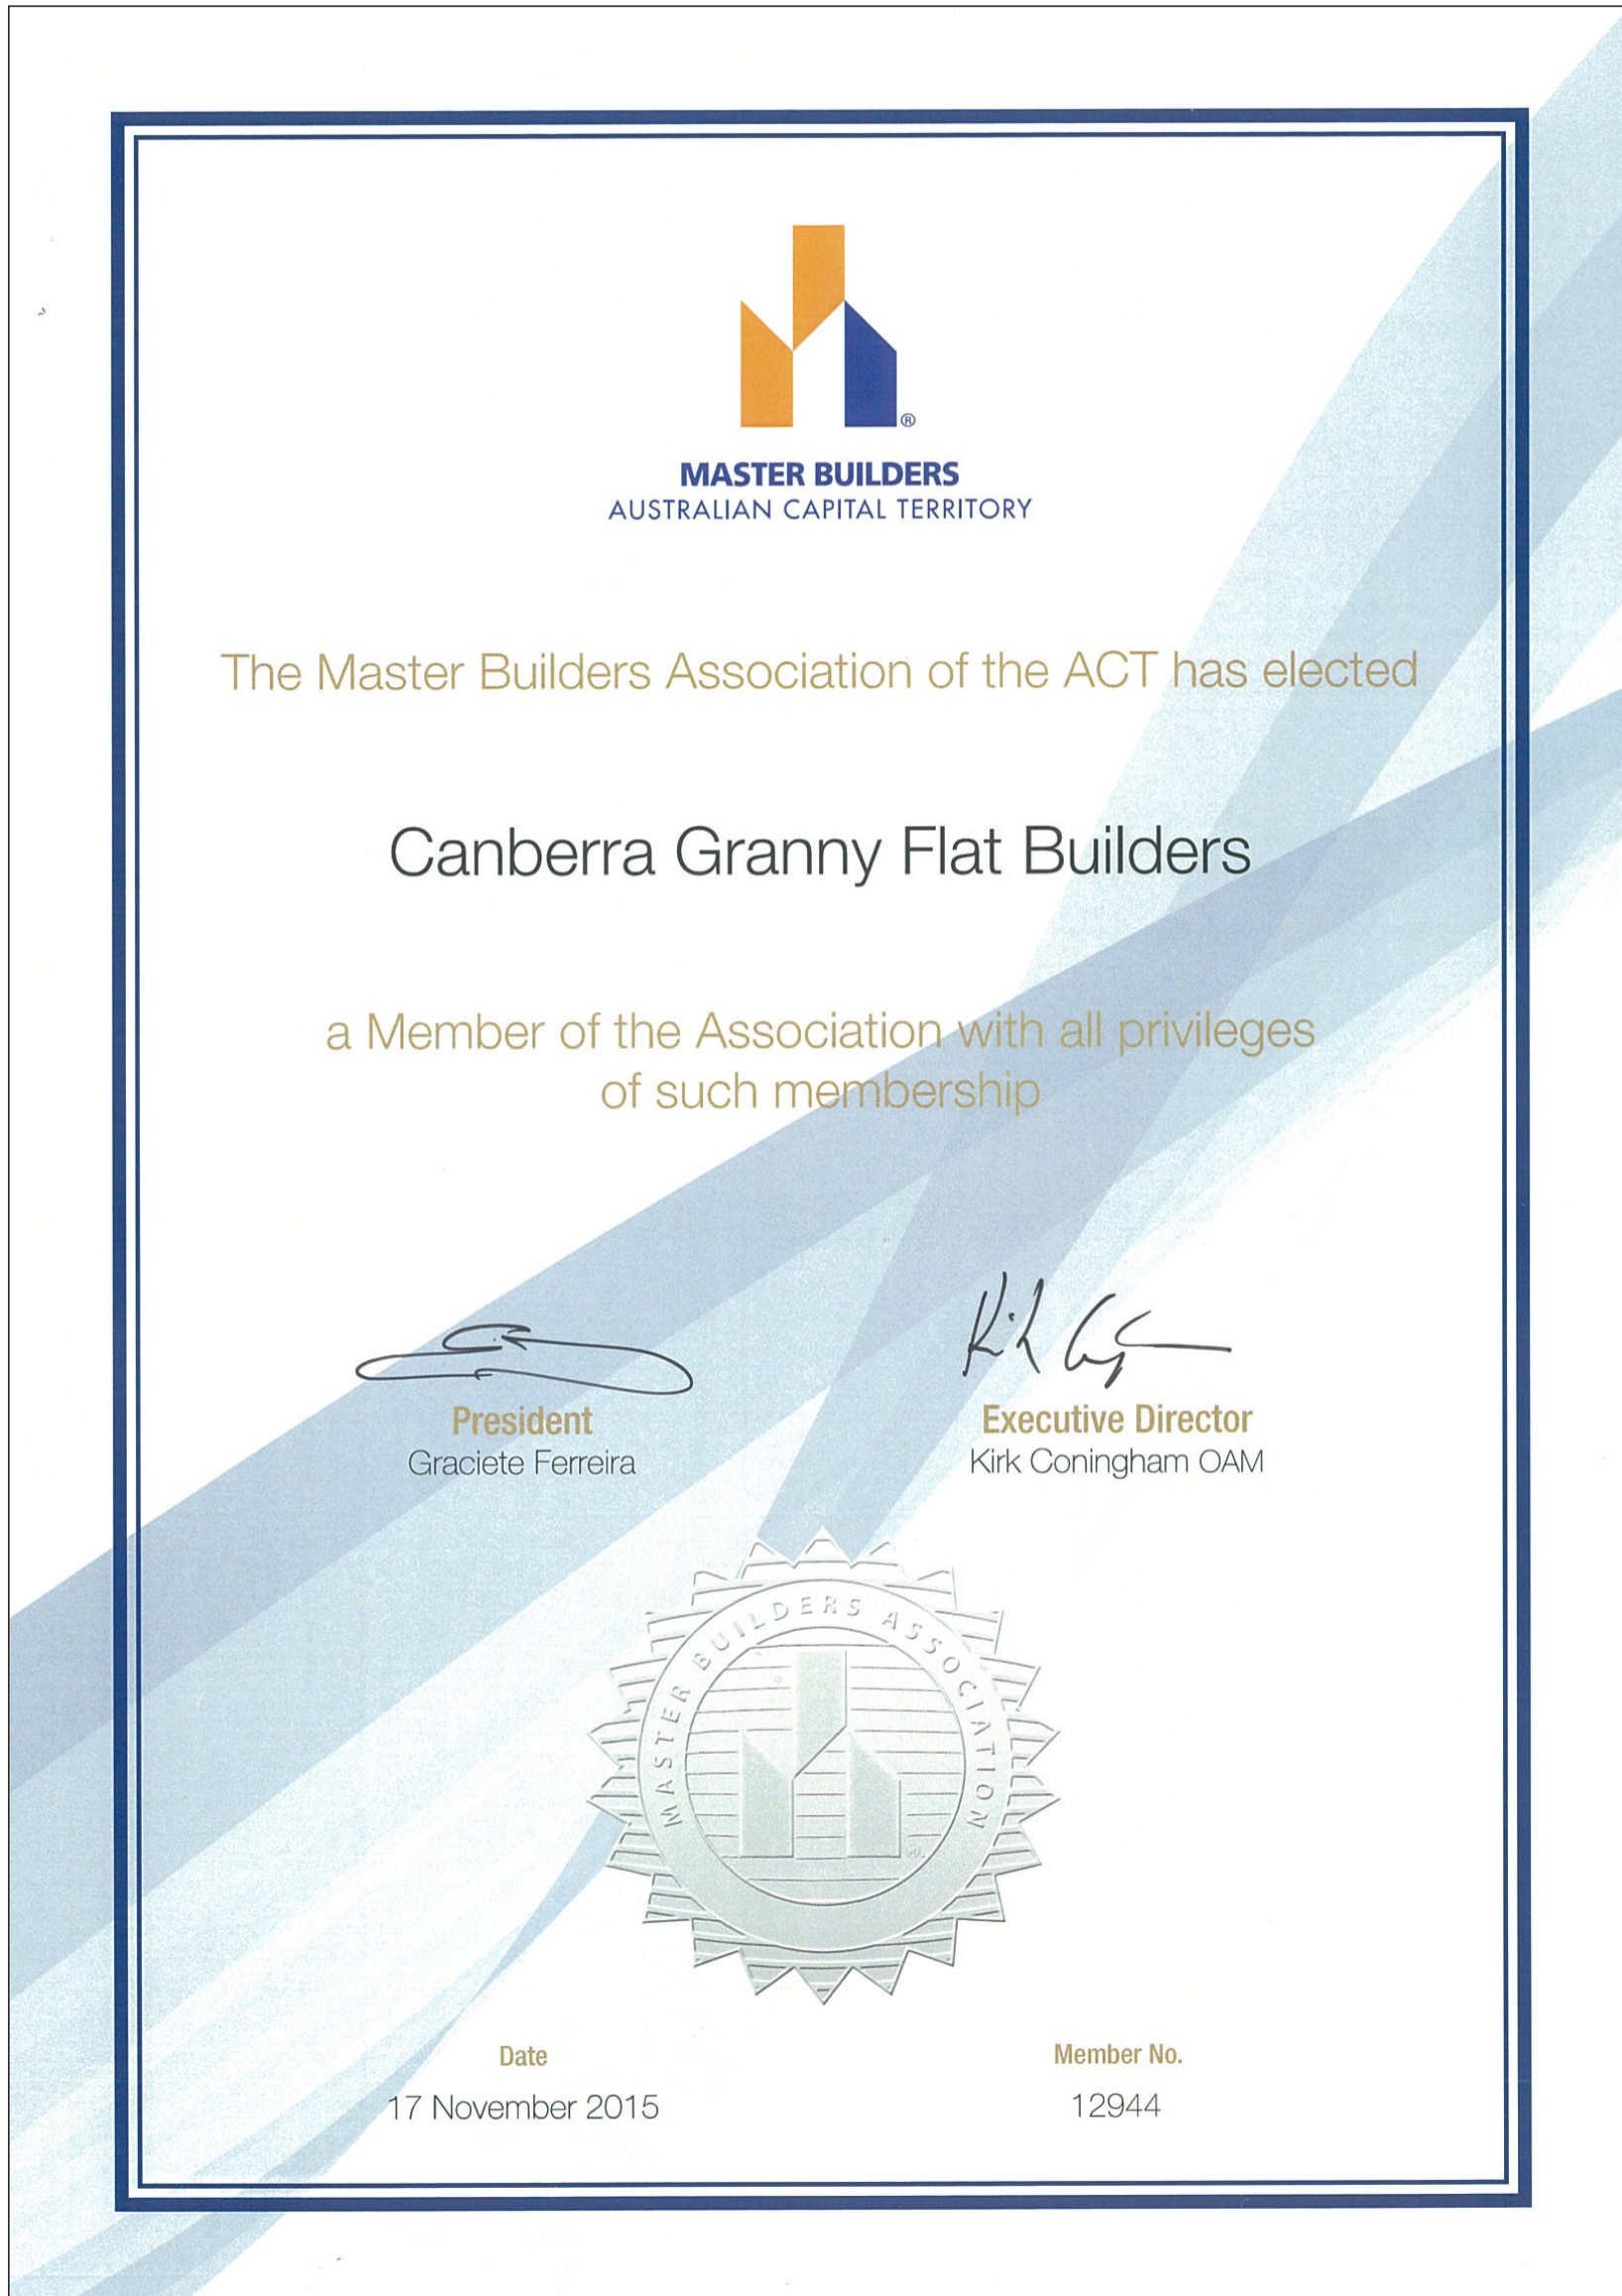

Canberra Granny Flat Builders are proud members of Master Builders Association ACT.

MBA is Australia's peak building and construction industry association. In the ACT, Master Builders was formed in 1925 and represents the interests of commercial builders, residential

builders, civil contractors, suppliers/subcontractors and professionals.

The MBA ACT is also a Registered Training Organisation and a Group Training Organisation.

Find more information at mba.org.au

The certificate is framed in a dark blue border. At the top center is the Master Builders logo, consisting of three stylized vertical bars in orange, yellow, and blue, with the text "MASTER BUILDERS AUSTRALIAN CAPITAL TERRITORY" below it. The main text of the certificate is centered and reads: "The Master Builders Association of the ACT has elected Canberra Granny Flat Builders a Member of the Association with all privileges of such membership". Below this, there are two signatures. On the left is the signature of Graciete Ferreira, with the title "President" and name "Graciete Ferreira" below it. On the right is the signature of Kirk Coningham OAM, with the title "Executive Director" and name "Kirk Coningham OAM" below it. At the bottom center is a circular seal of the Master Builders Association, featuring a stylized building icon and the text "MASTER BUILDERS ASSOCIATION". At the bottom left, the date "17 November 2015" is printed, with "Date" above it. At the bottom right, the member number "12944" is printed, with "Member No." above it.

Canberra Granny Flat Builders is a business that is committed to designing and building secondary residences in the Australian Capital Territory. A secondary residence or a 'Granny Flat' is a detached residential structure built in a backyard.

Q. What is a secondary residence?

A. Commonly known as a granny flat, a secondary residency in the ACT is a self-contained residential structure built on a block of land which is in addition to an existing residence. The legislation provides that a secondary residence can be rented separately to an existing residence. This means that separate electrical, water and gas metering can be achieved for the majority of secondary residences.

Q. What size can a secondary residence be?

A. A secondary residence should have a minimum size of 40m² floor area up to a maximum of 90m² floor area. In addition to your granny flat, you can build additional structures such as garages, carports, alfresco areas and pergolas. These additional structures do not count towards the total gross floor area of the secondary residence; however considerations may need to be taken account as these structures count towards the total plot ratio allowable on your block.

Q. What is the minimum block size on which you can build a secondary residence?

A. A secondary residence can be considered on a minimum block size of 500m².

Q. Do you require development approval to build a secondary residence?

A. Yes. A development approval application must be submitted to gain approval to build a secondary residence. Development approvals are submitted to and assessed by the ACT Planning and Land Authority (ACTPLA). A development approval application may be subject to the rules set out in the following legislation and standards:

Building Act 2004;
Heritage Act 2004;
Planning and Development Act 2007;
Planning and Development Regulation 2008; Utilities Act 2000; and
Australian Standard AS 4299 Adaptable Housing.

Q. Once development approval is granted do we also need to obtain building approval?

A. Yes. Once we have secured development approval we will need to obtain building approval through a private building certifier.

Q. What does adaptable housing mean and how does it relate to our secondary residences?

A. Secondary residences are to be designed to be easily adaptable to meet the needs of people with a disability. This means that the dwelling should be designed to easily meet the Australian Standard AS 4299 (Adaptable Housing).

The Residential Zones Development Code - Element 4 Rule 13 requires all Secondary Residences to be easily adaptable to suit the needs of people with a disability. AS 4299 Adaptable Housing - attached

Q. What building classification will the secondary residence need to be

A. Secondary residences are classified as a Class 1a building. This is clearly defined in the Building Code of Australia. Structures like decks, garages, carports, stairs or ramps are classed as 10a buildings.

Q. How many bedrooms can a granny flat have?

A. Canberra Granny Flat Builders generally build secondary residences that have one to four bedrooms, with one to two bathrooms, a number of living spaces and a kitchen and laundry. There is no defined rule about the number of bedrooms.

Q. Will a granny flat in my backyard increase my rates or land tax?

A. No, building a Secondary Residence will not change your rates based on current ACT legislation.

Q. Can a Secondary Residence (granny flat) be rented in the ACT?

A. Yes, and legislation states that they can also be separately metered.

Q. Does Canberra Granny Flat Builders' manage the process to completion?

A. Yes. We manage every aspect of the build until it's ready to be occupied. Our customer guarantees ensure that we take full ownership and accountability from start to finish.

Q. Can a Secondary Residence (granny flat) be rented in the ACT?

A. Yes, and legislation states that they can also be separately metered.

Q. Does Canberra Granny Flat Builders` manage the process to completion?

A. Yes. We manage every aspect of the build until it's ready to be occupied. Our customer guarantees ensure that we take full ownership and accountability from start to finish.

Q. How much will a Secondary Residence (granny flat) cost me in the ACT?

A. It is important to note that we have designs with kitchens, bathrooms and full living functionality from \$100,000 including GST which are built onsite, and are world class. These designs are predominately Class 10a designs.

Our Class 1 designs commence from \$116,000 including GST up to \$350,000.

We are the only builders that we are aware of who provide 5 customer guarantees and manage the entire process with a fixed price agreement, so the price you agree to at the beginning is the price you pay at the end.

Q. Do you offer flexibility in the granny flat designs?

A. Yes. There are two options. We have created a range of designs you can choose from or we can provide a custom design service to suit your needs.

Q. Do I get to choose the inclusions in my granny flat?

A. Yes, if you wish to. We also offer a concierge service, for a fee, where one of our team will meet you at the retail supplier, record your choices

and provide them to our construction team.

Q. Are the granny flats built on-site or are they prefabricated in a factory?

A. We build the granny flats on-site with locally based and licensed tradesmen, and ensure they are compliant with the applicable ACT laws.

Q. Where are you located and why?

A. We share a small office in the city in the Melbourne Building just up from the corner London Circuit and Northborne Avenue. We do this to keep our costs down whilst trying to run an efficient and effective small business.

Q. Communicating with us?

A. As we spend most of our time building and working with clients we can't always get to our mobile phones. If you call us on 1300 979 658 Monday to Friday between 9:00 am - 5:00 pm we will be able to take your contact details and the relevant team member will aim to get back to you within 24 hours. Our email info@cgfb.com.au is checked daily during the week, but not on weekends.

Q. Do you have any disability-friendly designs?

A. All of our designs are built according to the Australian Standard AS 4299 (Adaptable Housing).

If you require a purpose-designed residence we can work with an occupational therapist to ensure that you get the design that meets your needs.

Q. What is GFA (Gross Floor Area)?

A. Gross floor area (GFA) means the SUM of the area of all floors of the building measured from the external faces of the exterior walls, or from the center

lines of walls separating the building from any other building, excluding any area used solely for rooftop fixed mechanical plant and/or basement car parking.

Q. What are the requirements for allocated car parking for a secondary residence?

A. The requirements of car parking for secondary residence is that at least one parking space is provided in addition to that required for the primary residence.

Parking space for secondary residence cannot be located in the front zone unless it can achieve all the following:

- Reasonable amenity of neighboring residential blocks
- Consistency with the value of the streetscape
- Public safety especially in relation to pedestrians and cyclists
- Reasonable surveillance of parking spaces

Information pertaining to the statutory requirements of secondary residence parking can be found in element 4.3 of the Residential Development Code.

Q. What paper do you use in your design brochures?

A. At Canberra Granny Flat Builders we are committed to the environment, and only used 100% recycled paper.

All the paper we use is FSC (Forest Stewardship Council) certified.
